Greg –

Thanks for joining us for the inspection today. It was great to see you and work together. We are requesting this all from bullseye, but while we wait I was wondering if you could send along what you have from bullseye on the raw materials and the refractory. I heard you did confirm the presence of hex chrome and are moving forward quickly (I'm guessing that was the subject of your convo with Dave). I'd love to see all the data you have as well so we can follow along too. Thanks!
